

Transitions Performance Index

Rationale and Purpose

A new compass is needed

Measuring capacity to adapt: Sustainability is not opposed to economic and social progress. The transformation needs to be global

Focusing of policy priorities: Consistent with Green Deal objectives

Promoting ownership by citizens: Conducting change in challenging times requires social consensus, democracy and ownership

Urgency: Scoreboards are a driving force for change

New metric of fair and sustainable progress: global, robust and multidimensional

Conceptual Framework

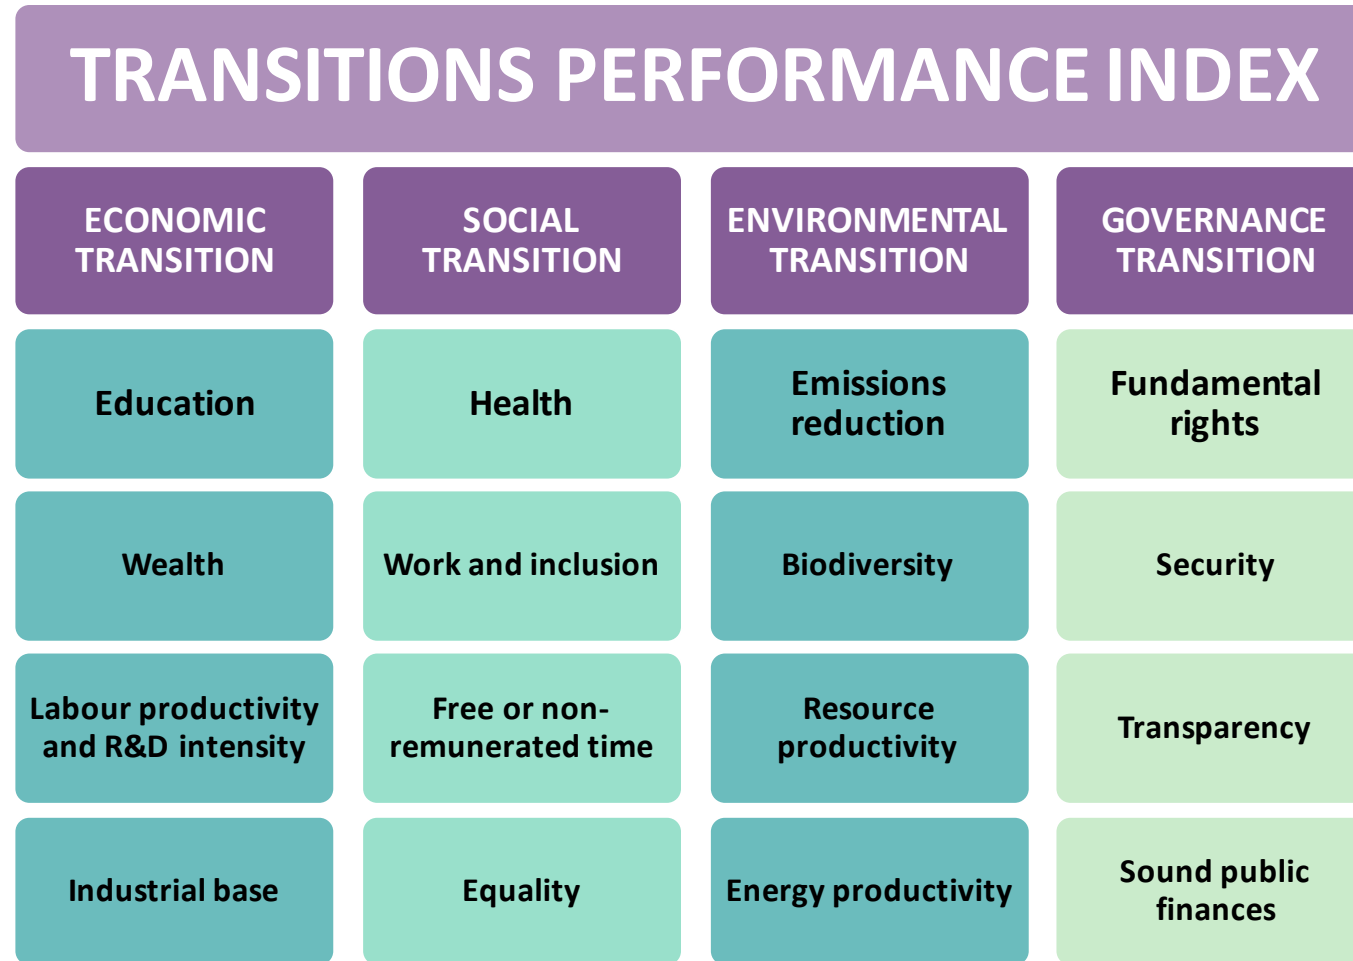

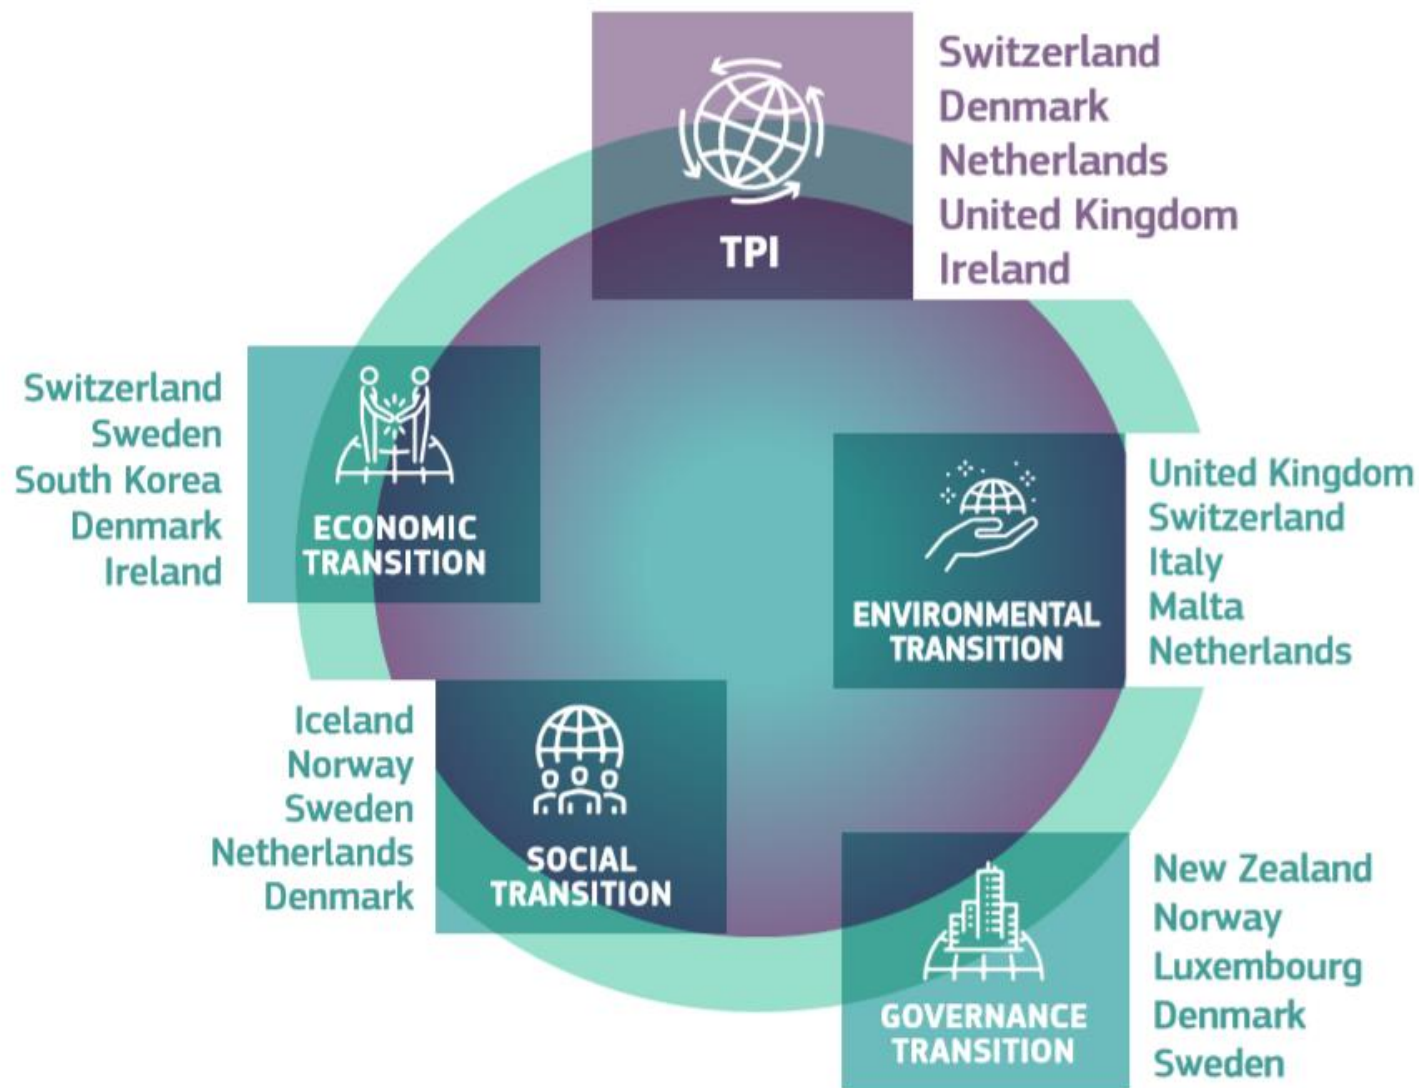

FIGURE J: Global TPI Top 5 performers by transition pillar
