

**Andreas Pyka** is Professor for Innovation Economics at the University of Hohenheim, Germany. His research interests include transformation processes towards a sustainable and climate neutral economy, the role of innovation for transformation and the application of new methodologies to overcome the limitations of mainstream economics in the analysis of long run developments. He is involved in several national and international research projects dealing with the impacts of the bioeconomy, artificial intelligence and robots, and mobility and energy change. His theoretical background is evolutionary and complexity economics. He graduated with a PhD in economics at the University of Augsburg where he also finished his habilitation in 2004. In the last years he was visiting professor at the TU Delft, at the Università degli studi dell'Insubria in Varese and the Université Paris 1 Panthéon-Sorbonne. He is editor-in-chief of the Journal of Innovation Economics and Management (Revue d'Economie et de Management de l'Innovation).
